3. The scholarships are awarded for the promotion of existing Indian industries and the development of new industries. They will not be given for law, medicine, forestry, veterinary science, agriculture, civil engineering (other than sanitary and municipal engineering) or geology, nor for the extraction of minerals or vegetable oil processing. It should be noted that certain industries in Europe, such as limonite, dyewood, tanning and manufacture of chemicals, very rarely offer facilities for practical work for students; in other branches of technological study, such as engineering and the various industries, adequate opportunities are probably to be found for students who possess the necessary qualities and training.

4. The scholarships are of the value of £150 per annum to be held subject to the observance by the scholar of the rules laid down for him by the Secretary of State. The scholarship may be withdrawn by the Secretary of State at the end of any year and it may be renewed while the scholar is living in and at work of the employer recommends the same. The selected scholar will also be expected to accept a bond (vide Annexure A) undertaking to repay the amount of the scholarship if he fails to return to India when instructed by the Secretary of State to do so.

5. The scholarship in Europe will be tenable for a variable term, not less than one year, nor more than five years. In certain cases it may be desirable that this should be preceded by a period of training of not less than one year and be followed by a period of about one year's practical work in India. In such cases, the Local Government will grant from Provincial revenue scholarships not exceeding Rs. 300 per annum for the preliminary training and scholarships not exceeding Rs. 150 per annum for the subsequent period of practical work.

6. Two scholarships are available for award to students from the Madras Presidency in 1918. Candidates desiring to present their study under this scheme should submit their applications to the Director of Public Instruction so as to reach him on or before the 15th September next.

Applicants will be considered only those persons who have already interested themselves personally in some industry and who are desirous of improving their knowledge of that industry by further training in Europe. Applicants should specify in their applications—

(a) their educational qualifications,

(b) the industry which they propose to study,

(c) their experience with the industry,

(d) the extent of their practical experience in it, and

(e) the proof, if any, of their intellectual aptitude or industrial bent of mind.

Every applicant should also furnish proof—

(1) that he is a native of India, i.e., a person born and domiciled within the dominions of His Majesty in India, of persons habitually resident in India and not established there for temporary purposes only;

(2) that he has the consent of his family (i.e., of his father or guardian) to proceed to Europe as directed;

(3) that his character is good;

(4) that he is not over 30 years of age;

(5) that he has sufficient knowledge of the English language; and

(6) that he is physically fit to undergo the course of life and study that he will have to follow.

7. In the case of indigenous industries, such as tanning, four spinning, etc., a scholar should, if possible, in addition to an aptitude for the industry, be already acquainted with at least one educational qualification, but in the case of candidates who have not both qualifications, those who have the qualification of aptitude for the industry would be given preference, provided they have sufficient working knowledge of English to follow lectures in that language.

8. The educational qualifications referred to above are as follows: Those who are already holders of a degree should have read up to the standard of the B.Sc. degree or the B.A. (with Science) or have obtained a equivalent diploma. Those who take up any branch of engineering should have passed the B.A., B.Sc. or B.E. degree or have a knowledge of mechanical drawing and descriptive geometry, and should have taken mathematics, physics and chemistry among the subjects of their degree. Applicants should produce certificates from the University showing in what subjects they have passed, what degree of proficiency they have reached, and what marks they have secured. Certain special regulations regarding particular industries are incorporated in Annexure A to the notification.

9. Candidates should clearly understand (a) that the scholarships are not intended to induce the holders to propose them for Government service; (b) that the scholar in each case is selected for a definite purpose and will be required on proceeding to England to enter at once and without discussion of possible alternatives in the course of working laid down for him and to comply with whatever instructions he is to do otherwise kind of work he may involve; and (c) that, when his knowledge has been gained for the benefit of his country.

10. Selected scholars should, in the first instance, communicate with the Madras Students' Advisory Committee in order that they may obtain advice regarding certificates, etc., and they should, when proceeding to England, take with them the certificate of their committee, testimonials and other important personal documents suggested to them by the Secretary to the Madras Students' Advisory Committee.

11. Selected scholars who intend to begin their training in England with manual work should ordinarily reach England in March or April 1918. Scholars who intend to commence their training in Europe with purely academic work should reach England not later than the middle of September 1918. The scholarships will be payable from the date on which the scholar enters their service in a month after return passage if they serve on the continent of Europe in England and also with the full period of residence or are employed by a scheme in return within that period.

12. On the return of a scholar to India the Board of Selection is empowered by the Government with, with the sanction of local authorities and employers, endeavour to find employment for him whether he is provided with a further scholarship or not. When a scholar has a scholarship after

his return, the Board will settle the nature of his post-graduate training while he is desiring the scholarship and shall, if they think this fit and practicable, advise him of the new employer's report as to the way in which the scholar has progressed during his training and his value as a biological specialist. In such a case the scholar shall at the end of the period of his training receive from the Board a detailed statement of his training together with the final opinion of the Board as to his qualifications.

(1) The following rules have been issued by the Government of India for the guidance of Indian Government scholars in the United Kingdom:—

(1) All Government scholars are required to send themselves of the information and advice which the Educational Adviser to the Secretary of State for India and the Local Adviser* at University centres are to furnish to give them, and to apply to their Local Adviser* for instructions as regards their studies and in any circumstances of difficulty. The Local Advisers* at Oxford, Cambridge, Manchester, Edinburgh and Glasgow have charge of Government scholars studying at these Universities. Scholars studying elsewhere will be under the charge of the Educational Adviser in London. The Adviser in the proper person to bring before the Educational Adviser to the Secretary of State for India any matter requiring the sanction of the Secretary of State in Council.

(2) Every scholar should on reaching England at once report himself to the Educational Adviser in London at 21, Grosvenor Road, S.W. Accommodation for new arrivals is provided in that house. After seeing the Educational Adviser in London, and according with him in regard to his course of study, he should also call on the Educational Adviser to the Secretary of State for India at the India Office.

(3) Every scholar must obey all instructions which he may receive, either through the Educational Adviser to the Secretary of State for India or through his Local Adviser*, and must consult his Local Adviser* regularly in regard to his work. No course of study will be sanctioned which does not provide for an adequate practical training. Any course which has required the sanction of the Secretary of State will not be dispensed without similar sanction.

(4) Every scholar must, from time to time, whenever the Local Adviser* requires it, submit a certificate from the proper College or University authorities, or from any other authority under whom he is working, showing that his studies and progress have been satisfactory.

(5) Every scholar must devote himself exclusively during the term of his scholarship to the study of the subject for which his scholarship was granted. Any scholar who neglects his studies, so that he is unable to work for any other profession or vocation, will consider himself liable to forfeiture of his scholarship.

(6) Every scholar will be required to keep a journal diary, to be submitted at the end of each term to his Local Adviser*, and to be forwarded through the Local Adviser* at the end of each academic year to the Secretary of State for transmittal to India.

(7) Scholars will be expected to maintain their studies during vacations with the exception of three weeks in each year. Vacation study should, as far as possible, take form of practical work.

(8) Fifty per centum work, accompanied by a complete schedule of any extra expenses for food or travelling involved, should be sent in to the Local Adviser* six weeks before the end of any academic term. Scholarships are not entitled to any allowance in respect of the maintenance of all other expenses during time spent on vacation work, but a scholar who receives permission to visit the continent may, at the discretion of the Secretary of State for India in Council, consider that the circumstances render it desirable, be granted a subsistence allowance calculated at such rate as the Secretary of State may decide.

(9) Subject to a due compliance with the above conditions, the scholar's allowance will be paid quarterly in advance by the India Office to the Local Adviser* under whose charge he is. It will begin from the date of the scholar's reporting his arrival in England, and the Local Adviser* will inform him of the date of such instalments in accordance with his wishes. These instalments will be paid at the date of the scholar's reporting the amount to the issuing official quarter day. The instalments will be made in advance as, or after each official quarter day.

The allowance will, except in special cases, be at the rate of £100 a year.

(10) Every scholar is required to lodge with the Educational Adviser to the Secretary of State for India at the India Office, London, before his arrival in England, the sum of £10 for initial expenses. He will have no claim for payment of any monies until this deposit has been made.

(11) Charge for University and college fees, provision for previous training, and the necessary expenses of scholars by second class or by third class if so ordered, be available, will, if necessary, be defrayed by the Secretary of State. Applications for payment of all such charges should be made through the Local Adviser*. But charges for private tuition, unless specially sanctioned, for books, instruments, hotel bills and other miscellaneous items must be paid by the scholar himself.

(12) No claim can be advanced for the payment of any expenditure unless the scholar has obtained previous sanction from the Secretary of State.

(13) The scholarship is granted in the first instance for two years, unless the Secretary of State in the exercise of his discretion sees reason to terminate it sooner. Every scholar with Indian scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to comply with the rules here set forth. It may be temporary or it may be permanent. It may also be extended for a third year or not at any time if a scholar fails in health or conduct. It may also be extended to complete the scholar's training.

(14) On the expiration of the scholarship a scholar is provided by the India Office with a free second class passage to India, and he should apply for it without delay through his Local Adviser*. He is not entitled to make his own passage arrangements and to claim an allowance in the form of the India Office. If a scholarship is forfeited, or if it be completed before completion of its term, or if the holder of it, on completion of its term, declines to return to India when instructed to do so, the scholar will lose his claim to a free passage back to India.

* The Secretary to the University of Oxford Station at Oxford and the Secretary to the Southampton University at Southampton are the Local Advisers at Oxford and Southampton respectively.

† Term.—The school quarter days are the 1st of January, 1st of April, 1st of July and the 1st of October.

11. *Miners*.—(i) Scholarships in Mining (as distinguished from Geology) shall only be given to men who intend to become mine managers or mining engineers.

VII. *Award*.—No scholarship be granted to a candidate who does not possess some knowledge of the dying industry as carried on in India, and has reached the B.A. standard in chemistry.

Depositing—

(3) Intensive connection with the Indian industry is desirable, and a knowledge of Indian methods is essential.

(1) Where these conditions are satisfied, high academic qualifications need not for the present be insisted upon; a fair knowledge of chemistry, physics, and some knowledge of mathematics and equivalents with the correct system of weights and measures will suffice.
